

Kenneth Roman

Active DoD TS/SCI 2027

Cell: (XXX) XXX-XXXX
kr3338@drexel.edu

Certifications/Skills:

- CompTIA Security+ Cert
- SANS GSEC Cert
- RMF Experience 1
- DOD Environment Experience
- IA/Cyber Security Professional
- Strong IT Technical/Troubleshooting Skills
- ACAS/Security Center Experience
- Organization/Project Management
- VMware Administrator
- Identifying/reporting threats

Technical Proficiencies:

Platforms: CentOS, Kali Linux, Ubuntu, Debian; Microsoft Windows XP/7/10; Microsoft Windows Server 2008R2/2012

Infrastructure: Switches (Cisco, Juniper, Brocade), Routers (Cisco), VMware vSphere, ESXII

Network Tools: Wireshark, NMAP, TCP/IP, tcpdump

Software Tools: Metasploit, ACAS, Nessus, Security Onion, SCAP Compliance Checker

Professional Experience:

Naval Information Warfare Center (NIWC) Pacific

December, 2023 – Present

IT Specialist (full-time)

- Lead the implementation and continuous monitoring of the Risk Management Framework (RMF) for Coast Guard and Navy information systems, ensuring compliance with federal and DoD cybersecurity regulations
- Manage and oversee the development of security documentation, including System Security Plans (SSPs), Risk Assessments, Security Controls Traceability Matrices (SCTMs), and Plan of Action and Milestones (POA&Ms)
- Serve as the principal advisor to the Authorizing Official (AO) and other key stakeholders on all matters related to cybersecurity and RMF processes
- Coordinate and conduct security control assessments (SCAs) to validate compliance with security requirements and identify vulnerabilities within information systems
- Collaborate with system owners, administrators, and engineers to implement security controls, mitigate risks, and ensure systems operate at an acceptable level of risk
- Facilitate the Authorization to Operate (ATO) process, ensuring timely submission and review of RMF documentation for obtaining and maintaining system accreditation
- Monitor and assess the security posture of information systems through continuous monitoring activities, including vulnerability assessments, penetration testing, and configuration management reviews
- Provide guidance and training to system users, administrators, and other stakeholders on RMF processes, cybersecurity best practices, and risk management strategies
- Interface with internal and external audit teams, ensuring systems comply with security policies and are prepared for inspections and reviews

- Lead incident response efforts, including the investigation, documentation, and mitigation of security incidents and breaches
- Develop and implement corrective action plans to address findings from audits, inspections, and continuous monitoring activities
- Maintain up-to-date knowledge of emerging cybersecurity threats, vulnerabilities, and technologies to enhance the security posture of Coast Guard and Navy information systems

United States Air National Guard

February, 2012 – Present

1D7XX/X – Cyber Defense Operator (part-time)

- **One weekend a month, two weeks a year, or per orders**
- Provides mission-critical voice, data, and video services
- Deploys and operates expeditionary communications systems
- Establishes priorities, maintains, tests, troubleshoots, repairs network systems equipment, and circuits utilizing tools and test equipment
- Monitors performance of systems and circuits
- Configuration of switches and routers
- Troubleshoot network connectivity issues or system failure/errors
- Configuring switches uploaded with sensitive material to support a failsafe of information

Apex Systems supporting Lockheed Martin

January, 2021 – December, 2023

Systems Engineer (full-time)

- Appointed SME in implementing Application Whitelisting and Data-at-Rest capabilities using proprietary software
- Conduct Product Selections for several cybersecurity tools for the SSDS program
- Serve as Team Lead in producing system/software requirements and specifications at Systems and Subsystems level for cybersecurity tools
- Manage regression testing of implemented cyber capabilities for model integrity and stability
- Design and implement Cybersecurity Capability Test Plans and Test Procedures for Integration & Testing to meet customer requirements
- Assisted Team Lead in providing test vectors and intermediate testing support for Tactical Software Implementation phases

EHS Technologies/Life Cycle Engineering

October, 2017 – January, 2021

Information Systems Security Engineer/Cybersecurity Engineer (full-time)

- Maintains and adapts the lab to support the developmental tasks associated with the lab (i.e. changes to the hardware and software layouts and configuration)
- Maintains and monitors the necessary software associated with the labs
- Ensures compliance with the associated DoD, DON, and NAVSEA Instructions
- Technical lead for Nessus and Security Center Vulnerability scanning for 150 standalone assets for Test and Evaluation labs
- Lead in managing and maintaining assets within Alloy

- Identifies and creates procedures and CONOPs for access, boundary controls, and media scanning in accordance with policy, scanning, patching, and tasks associated with the developed environment
- Identifies lab operational states, risks, and improvements to management
- Maintains accurate software and hardware inventory control of lab components
- Developing necessary artifacts for the lab and in support of RMF
- Maintaining and executing duties assigned in support of the NSWCPD Cyber Matrix
- Able to operate IA tools (ACAS, SCAP, SCC, eMASS, STIG Viewer)

Information Systems Security Officer (full-time)

- Perform quarterly reviews to confirm IA compliance using the eMASS web application
- Meet with the customer Information Technology Coordinator (ITC) regularly to ensure service level expectations are being met, communicate emergent issues, discuss policy changes, and identify areas for improvement. Work with system owners and administrators to determine requirements for, and complete, IT security exception requests as required
- Audit over 200 assets by ensuring they are operated, used, maintained, and disposed of in accordance with the DoD/Local Security policies and procedures
- Prepare for the Information Systems Annual Review (ISAR) and Cyber Court audits
- Support the Information Assurance Vulnerability Management (IAVM) program requirements
- Write and publish Memorandum for Records (MFRs) to allow proper fields of security to Flash Media and outside equipment
- Develop RMF packages with the Authorization and Accreditation (A&A) team
- Identified Family Controls within the system for RMF implementation

Education:

- Community College of the Air Force – Associates in Applied Science and Logistics
 - Expected Graduation: December 2026
- Drexel University - Bachelor's in *Computing and Security Technology*
 - Expected Graduation: January 2029

Military Service:

USAF Guard, Cyber Defense Operator (E-5), February 2012 - Present

- Serve in a role that requires demonstration of leadership skills, appropriate handling of sensitive information, and strict adhering to USAF procedures and policies.
